RealCast Conference

**Remote Collaboration
Made Simple!**

Better than Being There!

Enterprises are constantly being challenged to improve the way they work and telework. One technology that can improve efficiency, reduce travel time and reduce the effects of distance is *web-conferencing*. While web-conferencing has been available for some time, it has been inhibited by complex setup, firewall problems, frequent disconnects and tricky operation. Enter **RealCast Conference**, a simple, reliable, "dial-tone"-type service. Read how **RealCast Conference** delivers intervention-free and interruption-free, *highly secure* collaborative meetings.

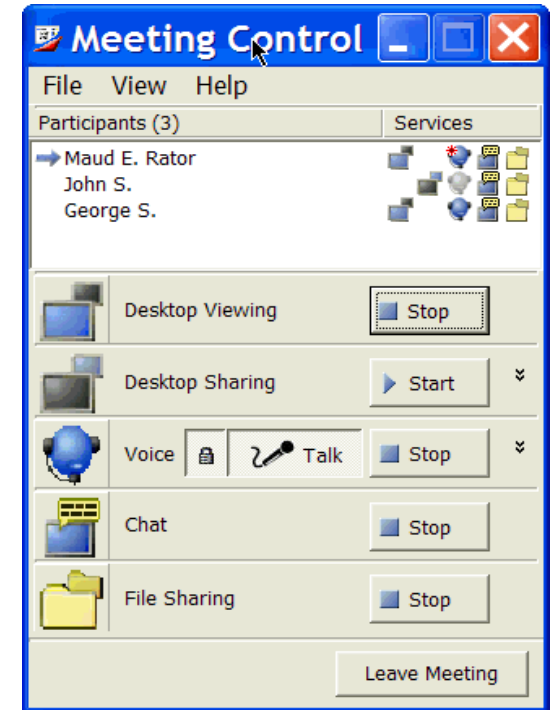

RealCast Conference gives you:

- *Security*: state-of-the art security and firewall handling
- *Simplicity*: single click setup and transparent operation
- *Reliability*: totally robust and stable, with servers available 24x7x365
- *Completeness*: all standard web-conferencing services and many unique features

RealCast Conference delivers intervention- and interruption-free business meetings so you can focus on the agenda, not the technology. Share applications and documents, carry on conversations, exchange documents and mark up the screen, cut and paste between computers...most importantly, get your business done with **RealCast Conference**.

Run Successful Meetings

RealCast Conference is incredibly simple to set up: Click on a secure link provided in an email, enter your name,

and you're in an **RealCast conference!** The Meeting Control Window shows who is in the conference and what services they are using. You can share your desktop or view another's. If desired, add a voice connection. Let others make a point using remote gesturing or enter their contribution using their keyboard. Annotate the shared desktop to emphasize key issues. When you are finished, exchange documents with your colleagues through the unique *File Sharing* feature. You will soon forget

that you are using **RealCast Conference** at all and will simply focus on achieving your meeting objectives.

Create a Meeting

Moderators can easily schedule meetings. Inviting participants is simple: just add them from your Outlook Address Book or enter them manually. **RealCast Conference** will then send Meeting Invitation emails to all participants. And Meeting Invitations are simple to modify when conditions change.

When you receive the Meeting Invitation, a single click is all it takes for you to add it to your Outlook Calendar. Any invited participant, whether a registered user or a guest, can simply click on the "Join

Meeting Now" link in their emailed meeting invitation to join an **RealCast Conference**.

Join a Meeting

If this is the first time that this you have used **RealCast Conference**, the software will quickly download and install itself, start running, and connect you to your conference. There is nothing more for you to do! If a teleconference is also scheduled, the dialing instructions are included in the email.

Share Anybody's Desktop

Jointly edit a Word document, co-browse the Web, review a PowerPoint presentation, or make a sales presentation. If you can run a Windows application, you can share it using **RealCast Conference**.

Chat with Colleagues

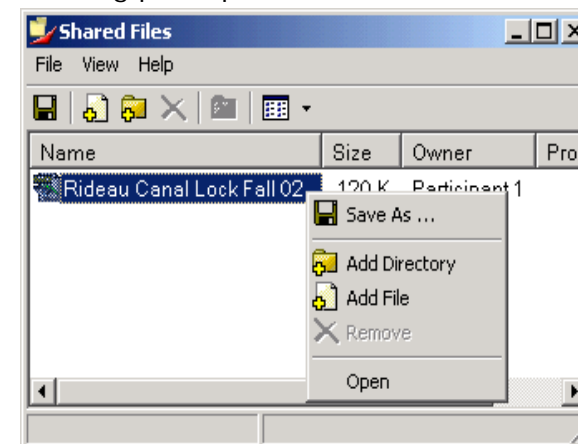

RealCast Conference's versatile Text Chat window makes it easy to do "silent" information exchange, such as the sending of a URL, during a meeting.

Talk to your Colleagues

RealCast Conference's Voice over IP (VoIP) service allows you to talk for free, without the need for a separate teleconference. A stereo headset with a noise canceling microphone will optimize the VoIP. It works with all standard PC audio configurations and adjusts itself for optimum performance. The VoIP operates in "Conversation" or "Push-to-Talk" modes. No PC, or headset, or sound card? No problem. **RealCast Conference** also offers *very* reasonably priced teleconferencing.

Share Files

When you wish to share a file, a folder, or even an entire file system, you can simply drag it into **RealCast Conference's** Shared Files Window and instantly it is available to all the other meeting participants. All file transfers are

compressed and encrypted, ensuring performance and ensuring your security!

State of the Art Security

We take security *very* seriously and our security provisions are second-to-none! Using 192-bit encryption to preserve the confidentiality of all of your data streams, employing state-of-the-art password algorithms for authentication, and preserving firewall integrity all contribute to ensuring that **RealCast Conference** maintains your confidentiality, data integrity, and privacy.

And MUCH More!

- Remote Gesturing and Control with ID
- Remote Copy and Paste
- Remote Ctrl-Alt-Del
- HTTP Tunneling
- Desktop Annotation
- Member accounts and guest privileges
- Monthly licensing or Enterprise pricing
- Administration/Oversight GUI

The Right Package/The Right Price

RealCast Conference is easy to install, easy to use, totally secure, and provides rock solid dependability. And you will find **RealCast Conference** to be very competitively priced—*far* lower than our competition. Contact us for details...You won't be disappointed!
